ABOUT ME

Passionate and driven, always eager to learn and explore new skills. Continuously striving for mastery in various disciplines while thriving in dynamic environments. A dedicated team player committed to fostering a high-performing culture through hard work, adaptability, and a relentless pursuit of excellence. Quality always takes precedence over quantity, with a strong emphasis on precision, attention to detail, and delivering work of the highest standard. Every task is approached with care and efficiency, ensuring excellence in every endeavor.

EDUCATION

2023 - 2026

NITTE Institute of Profession Education

Bachelors of Computer Application (BCA)

Specialization : Artificial Intelligence

CGPA: 9.33

EXPERIENCE

Data Science Intern – ShadowFox (Upcoming)

📍 **Virtual | March 2025**

- Working on real-time data science projects to develop practical skills.
- Applying analytical techniques to solve real-world challenges.
- Collaborating with peers and industry professionals to expand my network.
- Gaining foundational knowledge for entry-level roles in data science.
- Earning a certification upon successful completion.

PERSONAL PROJECTS

YouTube Clone

📍 **HTML & CSS**

- Developed a functional front-end replica of YouTube using HTML and CSS.
- Learned the fundamentals of web development, including structuring web pages with semantic HTML and styling with CSS.
- Implemented core concepts like flexbox, grid, and responsive design for an adaptive layout.
- Gained hands-on experience in designing a user-friendly interface, including a navbar, video grid, and sidebar.
- Explored real-world applications of HTML and CSS in building interactive and visually appealing web pages.

BlogPost Website

📍 **React.js & MongoDB**

- Developed a fully functional blog website using React.js for the front end and MongoDB for the database.
- Gained hands-on experience in building dynamic and interactive user interfaces with React.js.
- Learned best practices for handling user inputs, form validation, and data storage using MongoDB.
- Explored API integration, state management, and component-based architecture for scalable development.

Weather Forecast Website

📍 **HTML, CSS & JavaScript**

- Developed a weather application that displays real-time weather data for any country or city.
- Integrated a weather API to fetch live temperature, humidity, and weather conditions dynamically.
- Implemented JavaScript for API requests, data handling, and DOM manipulation.
- Designed a user-friendly interface with HTML & CSS, ensuring a clean and responsive layout.
- Learned essential concepts like asynchronous programming, API integration, and error handling.
- Enhanced usability by adding search functionality and real-time updates for user queries.

CERTIFICATES

- Enterprise Design Thinking Practitioner - IBM
- Introduction to Generative AI - Google cloud skill boost
- Basics of java - Alison
- Introduction to Credit Risk - TCS ion
- Prompt Engineering for AI applications - Alison

SKILLS

- Basics of python
- Fundamentals of React JS
- Critical Thinking
- AI application
- Team player
- Problem Solving
- Basics of MongoDB
- Collaboration
